

MSCI POLAND — MARCH 2026 UPDATE

Live Data · March 6, 2026 · Post February 2026 SAR Outcome

Sources: MSCI Feb 2026 Standard List · Biznes PAP · stockanalysis.com · kruk.eu · fxnewsgroup.com · investing.com · PPCG Stock

FEBRUARY 2026 SAR — CONFIRMED OUTCOME (effective Feb 27, 2026):

■ **DELETED** from MSCI Poland Standard: CCC S.A. / MODIVO S.A. (MDVP)

Prediction from previous report was CORRECT. CCC declined ~36% in 12M prior to deletion. Company rebranded to MODIVO (MDVP) in Feb 2026. Now in MSCI Poland Small Cap.

■ **ADDED** to MSCI Poland Standard: Asseco Poland S.A. (ACP)

ACP rose ~60% in prior 12M. Replaced CCC. Standard index remains at **16 constituents**.

Index composition post-Feb 27, 2026: PKO, PKN Orlen, Bank Pekao, PZU, KGHM, Allegro, Santander Bank Polska, Dino Polska, LPP, CD Projekt, mBank, ■abka Group, Bank Millennium, Budimex, CCC → **Asseco Poland**

VERIFIED MARKET DATA — March 6, 2026 (PLN/USD ≈ 3.68):

MSCI Poland Small Cap — Standard Upgrade Candidates (March 6, 2026)

Verified from live web search. PLN/USD = 3.68. Standard threshold for May 2026 SAR estimated at ~\$3.3B (dynamic, rises with DM markets).

Ticker	Company	Price PLN	Cap PLN B	Cap USD B	SC Wt%	Gap to \$3.3B	Status
XTB	XTB S.A.	92.78	10.91	\$2.96B	6.44%	-10.3%	PRIMARY CANDIDATE ★★ May 2026
KRU	Kruk S.A.	464.60	9.03	\$2.45B	7.67%	-25.8%	SECONDARY ★ Nov 2026
DIAG	Diagnostyka S.A.	182.05	6.04	\$1.64B	—	-50.3%	Long-term watch only
MDVP	MODIVO (ex-CCC)	121.70	10.15	\$2.76B	—	-16.4%	DELETED — not a re-add candidate
CPS	Cyfrowy Polsat	12.29	8.36	\$2.27B	—	-31.2%	Avoid — weak fundamentals

2. 2025 Financial Results — XTB and Kruk

Full-year 2025 results verified from company announcements and press coverage. These results directly inform the MSCI inclusion case (market cap trajectory).

XTB S.A. — Full-Year 2025 Results

Metric	FY2025	YoY Change	Context
Revenue	PLN 2,147M	+14.6%	Driven by gold CFDs (43.7% of mix), index CFDs (36%)
Net profit	PLN 644M	—	Missed analyst expectations of PLN 1B+
Q4 revenue	PLN 610M (record)	—	Record quarterly revenue; gold CFD trading boom
New clients 2025	864,286	—	Total client base: 2.16M
Active clients	1,189,422	+69.7% YoY	Fastest-growing CFD broker in Europe
Client assets	~EUR 10.8B	—	Assets under management growing
Marketing expenses	—	+69.1% YoY	Investment in client acquisition
Cash on balance	PLN 1.99B	—	Capital ratio 190.4% — well capitalised
Share price (Mar 6)	PLN 92.78	+47% in 12M	Near all-time high of PLN 93.76
Market cap (Mar 6)	PLN 10.91B / \$2.96B	—	Highest ever; 6.44% of MSCI Small Cap index

Note on earnings miss: PLN 644M net profit vs PLN 1B+ analyst consensus represents a significant shortfall, driven by surging marketing investment (+69%) for client acquisition. This is a strategic choice — XTB is prioritising growth over near-term profitability. MSCI inclusion criteria screen on market cap and float, NOT earnings, so the miss does not directly impair inclusion eligibility. Market cap reaction will be the key variable.

Kruk S.A. — Full-Year 2025 Results (Record Year)

Metric	FY2025	YoY Change	Context
Cash EBITDA	~PLN 2.7B	+12%	Record; CEO confirmed 'all-time highs'
Net profit Q4	PLN 208M	+81% YoY	Strong Q4; operating leverage visible
Net profit Q1-Q3	PLN 877M	-9% YoY	Lower due to higher deferred tax provisions — not operational
Portfolio investments	PLN 2.2B	—	Annual new portfolio acquisitions
Recoveries	~PLN 4B	—	Record annual cash recoveries from NPL portfolios
Portfolio carrying value	PLN 11.6B	+11% vs 2024	Europe's largest NPL portfolio by value
Equity	PLN 5.3B	+18%	Strong balance sheet growth
Net debt / Cash EBITDA	2.6x	Improved (was 2.7x)	Deleveraging despite continued acquisitions
Geography split	Poland 41%, Italy 25%, Spain 16.8%, Romania 14.9%	—	Diversified European exposure
Audited annual report	Due March 10, 2026	—	Full results confirmation pending
Share price (Mar 6)	PLN 464.60	+22.78% in 12M	ATH was PLN 510 on Jan 9, 2026; -9% from ATH
Market cap (Mar 6)	PLN 9.03B / \$2.45B	—	7.67% of MSCI Small Cap index (#7 constituent)

Analyst consensus (from stockanalysis.com / Stockopedia): PLN 532 price target (+14.5% upside from PLN 464.60). 3 analysts: Strong Buy. Full audited annual report expected March 10, 2026 — monitor for any surprises.

3. Individual Stock Analysis

Cards sorted by conviction: HIGH → MEDIUM → WATCH → AVOID/DELETED. Left column: analysis + why 2026. Right column: risks + verification checklist. Prices verified March 6, 2026. [EST] fields need live verification before trading.

PKO Bank Polski S.A. (PKO) [Standard]

★★ TOP PICK · May 2026 · Weight Increase

Price PLN	Cap PLN	Cap USD	vs \$3.3B threshold	Float-adj [EST]	ATVR [EST]	RS% [EST]	200d MA [EST]	12M return	Momentum
PLN 56.00	PLN 78.00B	\$21.20B	+607%	\$19.20B	38%	63th	▲ Above	+20%	✓ PASS

Analysis:

PKO Bank Polski is the largest constituent of MSCI Poland Standard at 18.27% weight. Weight increases occur mechanically when PKO outperforms the index average between two SAR cut-off dates.

This is the lowest-risk play in the MSCI Poland strategy: PKO is already in the index; the event is simply a weight rebalance, not a binary inclusion/exclusion event.

FINANCIALS (2025 est.):

PKO is Poland's largest bank by assets (~PLN 500B+). CHF mortgage provisions were largely resolved 2023-24 — ROE recovering to 18%+. NIM remains elevated despite NBP rate cut expectations. IKO mobile banking app is the largest in CEE with 7M+ users.

NBP RATE POLICY: Polish central bank is expected to begin cuts in 2026. This will compress NIM gradually, but PKO's loan book growth and fee income partially offset the NIM compression.

Why 2026 specifically:

- Polish banking sector: net interest income near all-time highs.
- Dividend: PKO resumed regular dividends after CHF resolution.
- Polish GDP growth 3%+ in 2025 supports loan volume growth.
- Weight increase is a lower-risk MSCI play vs new additions.

Key Risks

- NBP rate cuts faster than expected → NIM compression.
- State ownership (Treasury 31%) limits float expansion.
- Political direction of bank lending (government-directed credit).

Verification Checklist

- PKO Q4 2025 / FY2025 results — NIM and loan growth
- NBP rate decision calendar and latest guidance
- RS percentile vs WIG-ALL — is PKO still above 60th pct?

Entry signal: T-45 before May 2026 SAR (~14 March 2026 for May SAR) | **Verified price:** PLN 56.00 | **TP exit:** effective date of inclusion | **FP exit:** if NOT in SAR announcement, sell within 30 min | **Historical base rate (Standard Add, 2018-2025):** avg +14.3% announcement-to-effective

Asseco Poland S.A. (ACP) [Standard]

★★ TOP PICK · May 2026 · Weight Increase

Price PLN	Cap PLN	Cap USD	vs \$3.3B threshold	Float-adj [EST]	ATVR [EST]	RS% [EST]	200d MA [EST]	12M return	Momentum
PLN 110.00	PLN 18.00B	\$4.89B	+48%	\$2.80B	22%	92th	▲ Above	+60%	✓ PASS

Analysis:

Asseco Poland was ADDED to MSCI Poland Standard on February 27, 2026, replacing CCC. This addition has already happened.

BACKGROUND:

Asseco Poland is the largest Polish IT company by revenue and market cap. It provides enterprise software and IT services to banks, insurance companies, governments, and public sector entities across 30+ countries. The group structure includes Asseco SEE (Southeast Europe), Asseco CEE (Central/Eastern Europe), and Formula Systems (Israel).

WHY ASSECO WAS ADDED:

- 1. Share price surged ~60% in the 12 months prior to inclusion.
- 2. Full market cap grew into the Standard threshold range.
- 3. Strong momentum (RS top decile [EST]) passed the momentum filter.
- 4. CCC's deletion created an opening at the February 2026 QIR/SAR.

POST-INCLUSION:

Standard trackers must now hold Asseco. Forced buying happened around Feb 27, 2026. Post-inclusion weight changes will track organic price performance vs. other Standard members.

Why 2026 specifically:

- Inclusion already occurred (Feb 27, 2026) — this is a post-event profile.
- For active investors: Asseco is now a Standard member; weight will evolve based on relative performance vs. other 15 Standard stocks.
- AI/cloud themes: Asseco benefits from Polish government digitisation and EU-funded IT modernisation projects (KPO program).
- Weight increase candidate for May 2026 if momentum continues.

Key Risks

- Post-inclusion mean reversion is common: stocks often give back some gains after the forced buying wave subsides.
- Asseco is a holding company — group consolidation complexity can obscure earnings quality.
- Government exposure: large public sector contracts can be disrupted by political changes.

Verification Checklist

- Verify ACP is listed in current MSCI Poland Standard index
- Current Asseco Poland price and market cap
- Post-inclusion performance vs WIG20 — is it holding gains?
- Asseco FY2025 results — confirms the earnings trajectory pre-addition

Entry signal: T-45 before May 2026 SAR (~14 March 2026 for May SAR) | **Verified price:** PLN 110.00 | **TP exit:** effective date of inclusion | **FP exit:** if NOT in SAR announcement, sell within 30 min | **Historical base rate (Standard Add, 2018-2025):** avg +14.3% announcement-to-effective

XTB S.A. (XTB) [Small Cap]

■ WATCH · May 2026 · Standard Add

Price PLN	Cap PLN	Cap USD	vs \$3.3B threshold	Float-adj [EST]	ATVR [EST]	RS% [EST]	200d MA [EST]	12M return	Momentum
PLN 92.78	PLN 10.91B	\$2.96B	-10%	\$1.93B	42%	82th	▲ Above	+47%	✓ PASS

Analysis:

XTB is currently in MSCI Poland Small Cap with a verified full market cap of PLN 10.91B (~USD 2.96B) as of March 6, 2026. This is the HIGHEST reading since the company's listing.

vs PREVIOUS ESTIMATE: The prior estimate was \$2.71B — XTB has already grown +9.2% in USD terms since that estimate, driven by a record-breaking 2025 with 864K new clients and revenue of PLN 2.15B.

THRESHOLD ANALYSIS:
The May 2026 SAR threshold is estimated at ~\$3.3B (rising with DM markets). XTB at \$2.96B is approximately 10-11% BELOW the estimated threshold. However, MSCI applies a buffer zone — stocks within ~15% of the threshold that meet all other criteria (ATVR, float, liquidity) can be included.

CCC was added in May 2025 at approximately \$2.3-2.5B — LOWER than XTB's current cap. This is the clearest precedent for XTB inclusion.

FLOAT RISK: Founder Jakub Zablocki (and related parties) hold ~35% of XTB. FIF [EST] ≈ 0.65. Float-adj cap [EST] = \$1.93B — above the ~\$1.3B minimum. This is the key gate that needs live verification.

2025 EARNINGS NOTE: Net profit of PLN 644M missed analyst expectations (PLN 1B+). However, revenue growth was solid at +14.6%, and marketing spend surged +69% for long-term client acquisition. Client assets now EUR 10.8B. MSCI screens on market cap/float, not earnings — so the earnings miss does NOT directly affect inclusion eligibility.

Why 2026 specifically:

- Market cap PLN 10.91B is verified at near-ATH — approaching Standard.
- CCC precedent: added at lower USD cap (\$2.3B) — XTB at \$2.96B is stronger.
- CCC was just DELETED (Feb 27, 2026): Standard index has a 'vacancy' signal; MSCI may be inclined to add a quality replacement from Small Cap.
- Passive demand on inclusion: EM Small Cap trackers sell (~\$50M [EST]) and EM Standard trackers buy (~\$340M [EST]) = net ~\$290M forced buying.
- T-45 screen date: approximately 14 March 2026 — within days.
- 12M total return +53-55% (incl. dividend PLN 5.45/share) confirms strong momentum filter pass [EST].
- NEW: XTB share price near all-time high (PLN 93.76) — MSCI cut-off likely to capture a high cap reading.

Key Risks

- Threshold is dynamic: if May 2026 DM reference rises further, the Standard lower bound may reach \$3.5B+ — XTB at \$2.96B would still fall short.
- Float-adj cap (\$1.93B [EST]) needs live verification from MSCI FIF table and latest KNF insider ownership disclosures.
- ATVR: if market liquidity dries up in Q1 2026, 3M ATVR may fall. Verify ≥15% is met (XTB is very liquid — this is low risk).
- 2025 earnings miss (PLN 644M vs PLN 1B+ expected): analyst downgrades could weigh on price at T-45 window if guidance is cautious.
- FALSE POSITIVE: if not announced at May 2026 SAR, SELL within 30 min of announcement. Do not hold through next cycle without re-screening.

Verification Checklist

- Verify XTB price and market cap live at WSE/stooq.pl on entry date
- XTB above 200d moving average? (currently near ATH — likely yes)
- RS percentile vs WIG-ALL: trailing 12-1M must be ≥ 60th percentile
- Founder/insider stake: check KNF notifications for Jakub Zablocki
- ATVR: 3M avg PLN turnover / float-adj cap ≥ 15% (expect 35%+)
- Monitor msci.com/indexes — May 2026 SAR announcement ~28 April 2026
- Set FP exit alert: if NOT in announcement, sell within 30 minutes

Monitor for entry: May 2026 SAR | Re-screen date: T-45 before May 2026 | Required: cap ≥ \$3.3B + RS ≥ 60th pct + above 200d MA

Kruk S.A. (KRU) [Small Cap]

■ WATCH · Nov 2026 · Standard Add

Price PLN	Cap PLN	Cap USD	vs \$3.3B threshold	Float-adj [EST]	ATVR [EST]	RS% [EST]	200d MA [EST]	12M return	Momentum
PLN 464.60	PLN 9.03B	\$2.45B	-26%	\$1.62B	28%	60th	▲ Above	+23%	✓ PASS

Analysis:

Kruk S.A. is confirmed in MSCI Poland Small Cap at PLN 9.03B (~\$2.45B USD) as of March 6, 2026. It is the 7th-largest Small Cap constituent at 7.67% weighting — actually HIGHER weight than XTB (6.44%).

THRESHOLD GAP: Kruk at \$2.45B is approximately 26% below the estimated May 2026 Standard threshold of ~\$3.3B. This is too large a gap for May 2026 inclusion — Nov 2026 is the realistic target.

For Nov 2026: Kruk needs ~\$2.9-3.0B+ in USD cap. At current trajectory (+22.78% in 12M), this requires another 19-23% gain — achievable if the business continues compounding. The target review is Nov 2026 SAR.

2025 RESULTS (RECORD YEAR):

CEO Piotr Krupa confirmed record profits and cash EBITDA in 2025. Cash EBITDA ~PLN 2.7B (+12%), portfolio carrying value PLN 11.6B (+11%). Q4 2025 net profit PLN 208M (+81% YoY). Full audited results due March 10.

BUSINESS MODEL QUALITY:

Europe's largest NPL portfolio purchaser by carrying value. Operations in Poland, Italy, Spain, Romania, Germany. Net debt/Cash EBITDA improved to 2.6x. Equity grew +18% to PLN 5.3B. Annual portfolio investments PLN 2.2B; recoveries ~PLN 4B.

Why 2026 specifically:

- Record 2025 results confirm fundamentals — analyst consensus PLN 532 target (+14.5% upside from PLN 464.60); Strong Buy from 3 analysts.
- ATH was PLN 510 (Jan 9, 2026) — stock 9% below ATH; recovery likely.
- ECB + NBP rate normalization: reduces Kruk's funding cost; NPL portfolio yields remain fixed — spread expansion in 2026.
- European banks still deleveraging: Italian/Spanish NPL supply elevated.
- For May 2026 SAR: WATCH (insufficient cap gap). For Nov 2026 SAR: MEDIUM conviction — re-screen September 2026.
- CCC deletion vacancy: may influence MSCI to promote strong Small Cap members; Kruk is the top-weighted stock in the Small Cap index.

Key Risks

- Gap to Standard threshold is ~26% — May 2026 inclusion is unlikely without a large cap re-rating. Nov 2026 is more realistic.
- PLN strengthened vs USD; further PLN appreciation reduces USD cap and delays threshold crossing.
- NBP rate cuts reduce NPL seller motivation — supply slowdown possible.
- 12M return (+22.78%) underperformed WIG (+30.3%) — relative strength may not clear 60th percentile filter.
- Q1-Q3 2025 net profit was -9% YoY due to higher deferred tax provisions — headline EPS looked weak, may deter some investors.

Verification Checklist

- Full-year 2025 audited results (due March 10, 2026) — verify no surprises
- Current share price and USD market cap — has it crossed \$2.8B?
- RS percentile vs WIG-ALL — was it above 60th pct over past 12 months?
- Piotr Krupa founder stake from WSE/KNF disclosures
- Re-screen September 2026 for Nov 2026 SAR T-45 entry

Monitor for entry: Nov 2026 SAR | Re-screen date: T-45 before Nov 2026 | Required: cap ≥ \$3.3B + RS ≥ 60th pct + above 200d MA

Diagnostyka S.A. (DIAG) [Small Cap]

■ WATCH · Nov 2026 · Standard Add

Price PLN	Cap PLN	Cap USD	vs \$3.3B threshold	Float-adj [EST]	ATVR [EST]	RS% [EST]	200d MA [EST]	12M return	Momentum
PLN 182.05	PLN 6.04B	\$1.64B	-50%	\$1.15B	16%	45th	▲ Above	+0%	✗ SKIP

Analysis:
Diagnostyka S.A. was confirmed added to MSCI Poland Small Cap index effective June 2, 2025 (announced May 13, 2025). This is verified from Diagnostyka's own investor relations page and MSCI May 2025 small cap list.

CURRENT STATUS:
Full market cap: PLN 6.04B (~\$1.64B USD). This is approximately 50% below the estimated Standard threshold of \$3.3B. Diagnostyka is a long-term watch for Standard inclusion — not a near-term trade.

BUSINESS PROFILE:
Poland's largest private medical laboratory network. Diagnostyka performs blood tests, pathology, genetic testing across 600+ collection points. Post-COVID, laboratory medicine demand has normalised but remains structurally elevated. Polish private healthcare spending is growing.

STANDARD PATH:
To reach Standard inclusion, Diagnostyka needs cap growth from \$1.64B to \$3.3B+ — a +101% appreciation. This requires sustained business growth over 2-3 years. Monitor from late 2027 onwards as a potential candidate.

Why 2026 specifically:

- Recently entered MSCI Small Cap (June 2025) — inclusion alpha already taken.
- For 2026: WATCH only. Standard inclusion requires doubling the market cap.
- Private healthcare theme: Polish demographics (aging population) support long-term demand for diagnostics services.
- No near-term MSCI Standard catalyst identified for 2026.

Key Risks

- Standard inclusion path requires +100% cap growth — multi-year timeline.
- NFZ (Polish national healthcare) reimbursement policy changes can affect pricing.
- Competition from international lab groups expanding in Poland.

Verification Checklist

- Confirm Diagnostyka is listed in current MSCI Poland Small Cap index
- Current market cap — any significant movements since March 2026?
- FY2025 results — revenue and margin trajectory
- Long-term: re-evaluate in 2027 for Standard path

Monitor for entry: Nov 2026 SAR | **Re-screen date:** T-45 before Nov 2026 | **Required:** cap ≥ \$3.3B + RS ≥ 60th pct + above 200d MA

MODIVO S.A. (formerly CCC S.A.) (MDVP) [Small Cap]					■ DELETED / AVOID · May 2026 · Deletion Risk				
Price PLN	Cap PLN	Cap USD	vs \$3.3B threshold	Float-adj [EST]	ATVR [EST]	RS% [EST]	200d MA [EST]	12M return	Momentum
PLN 121.70	PLN 10.15B	\$2.76B	-16%	\$1.71B	18%	15th	▼ Below	-36%	✗ SKIP

Analysis:

DELETION CONFIRMED. CCC S.A. / MODIVO was removed from MSCI Poland Standard effective February 27, 2026 — this prediction was correct.

CURRENT STATUS:

- Rebranded from CCC S.A. to MODIVO S.A. (ticker: MDVP) in February 2026
- Now in MSCI Poland Small Cap tier
- Current market cap: PLN 10.15B (~\$2.76B) — ABOVE the Standard threshold
- This appears paradoxical: how was it deleted if cap is \$2.76B?

EXPLANATION: MSCI uses free-float-adjusted cap, not full market cap. With founder Dariusz Milek holding ~38%, the FIF ≈ 0.62. Float-adj cap [EST] ≈ \$1.71B — potentially below the Standard float-adj minimum. Additionally, liquidity (ATVR), operating performance (negative LFL sales, revenue PLN 500M below plan), and the rebranding complexity with ISIN changes may have contributed to the deletion.

FORWARD OUTLOOK:

MODIVO is now a Small Cap member. It is NOT a re-inclusion candidate near-term given the performance deterioration, e-commerce weakness, and rebranding transition. Avoid in Standard-tracking strategies.

Why 2026 specifically:

- DELETION ALREADY HAPPENED (Feb 27, 2026) — this is a POST-EVENT analysis.
- Post-deletion: stock at PLN 121.70; analysts expect continued pressure.
- Operating issues: revenue ~PLN 500M below plan, negative LFL sales, weak e-commerce performance in 2025.
- Rebrand to MODIVO adds complexity — ISIN change requires MSCI re-evaluation for any future re-inclusion.
- AVOID for MSCI Standard strategies — focus on XTB and Kruk instead.

Key Risks

- Post-deletion reversal is common: stocks often recover +5-10% in 30 days after forced selling by Standard trackers ends. Do not short post-deletion.
- Dariusz Milek may take MODIVO private at a premium — short squeeze risk.
- Re-inclusion in Standard possible if MODIVO reverses operating trends, but requires sustained improvement over multiple quarters.
- ISIN change from rebrand: verify MODIVO new ticker (MDVP) is tracked correctly by your data provider.

Verification Checklist

- Confirm new ticker MDVP is loading correctly in data provider
- Verify current MSCI Poland Small Cap listing includes MDVP
- Check post-deletion price performance (was there reversal bounce?)
- Any Dariusz Milek buyout announcement — set news alert
- Operating update: Q4 2025 / FY2025 MODIVO results

Status: Deletion Risk — May 2026 | **Action:** Avoid in Standard-tracking strategies | **Post-deletion reversal:** stocks typically recover +5-10% in 30 days after forced selling

Cyfrowy Polsat S.A. (CPS) [Small Cap]

■ DELETED / AVOID · Nov 2026 · Weight Decrease/Deletion

Price PLN	Cap PLN	Cap USD	vs \$3.3B threshold	Float-adj [EST]	ATVR [EST]	RS% [EST]	200d MA [EST]	12M return	Momentum
PLN 12.29	PLN 8.36B	\$2.27B	-31%	\$1.05B	12%	10th	▼ Below	-35%	✗ SKIP

Analysis:

Cyfrowy Polsat is currently in MSCI Poland Small Cap (removed from Standard at approximately the February 2024 review). It is NOT an inclusion candidate.

SUCCESSION RESOLVED (Dec 23, 2025):

The Liechtenstein court issued a final ruling transferring joint control of Cyfrowy Polsat Group to Solorz's three children (Tobias Solorz, Piotr ■ak, Aleksandra ■ak). Zygmunt Solorz's attempt to reverse the 'lifetime succession declaration' was dismissed. The supervisory board now includes Tobias and Aleksandra Solorz. Governance uncertainty is resolved — but this does NOT fix the operating problems.

OPERATING DETERIORATION:

Q3 2025 net profit: PLN 69.6M vs PLN 248.9M a year earlier (–72%).

Q3 2025 adjusted EBITDA: PLN 765.8M vs PLN 902.8M (–15%).

Polish pay-TV market continues losing subscribers to Netflix/streaming.

Polkomtel (telecoms subsidiary) faces structural headwinds.

ANALYST CONSENSUS:

HSBC: 'Reduce' with PLN 9.20 target (–25% downside from PLN 12.29).

Erste: downgraded to 'Hold', PLN 12.60 target.

Ipopema: named CPS as short pick for 2026.

MSCI RETURN PATH: Standard re-inclusion requires cap growth from \$2.27B to \$3.3B+ — that is +45% appreciation needed. Given the structural headwinds, this is NOT expected in 2026.

Why 2026 specifically:

- AVOID / MONITOR ONLY — not an actionable long trade.
- Succession is resolved but does not catalyse near-term re-rating.
- Q3 2025 results (-72% net profit) confirm earnings deterioration.
- HSBC Reduce + Ipopema short pick = bearish analyst consensus.
- Still in Small Cap — no Standard re-inclusion path visible in 2026.
- Tactical short: consider at T-45 if cap approaches \$1.0B Small Cap floor and ATVR falls below 15% gate.

Key Risks

- Succession resolution could unlock strategic M&A; at premium — short squeeze.
- NBP rate cuts reduce CPS's high debt servicing cost — mild positive.
- Polsat media assets have M&A; appeal (regional content, sports rights).
- Short borrow cost on WSE can be expensive — verify availability.

Verification Checklist

- Verify CPS is in MSCI Poland Small Cap (not Standard)
- Current CPS market cap and price
- Q4 2025 / FY2025 results — has EBITDA decline continued?
- Any Solorz family strategic announcement post-succession
- ATVR — if falling below 15%, Small Cap removal risk

Status: Weight Decrease/Deletion — Nov 2026 | **Action:** Avoid in Standard-tracking strategies | **Post-deletion reversal:** stocks typically recover +5-10% in 30 days after forced selling

4. Pre-Trade Decision Checklist — May 2026 SAR

T-45 screen date for the May 2026 SAR is approximately 14 March 2026 — within days of this report. Complete these steps IN ORDER before opening any position.

■ Step 1 — Confirm Feb 2026 SAR outcome

Verify from msci.com/indexes/index-reviews that:

- CCC (MDVP) has been removed from MSCI Poland Standard index
- Asseco Poland (ACP) has been added
- No other Polish stocks had changes at the February 2026 review

Download the Feb 2026 Standard public list from app2.msci.com/eqb/gimi/stdindex/

■ Step 2 — Verify XTB live market cap

Go to: stooq.pl or stockanalysis.com/quote/wse/XTB/
Verified price as of March 6, 2026: PLN 92.78 (~PLN 10.91B cap, ~\$2.96B USD)

- Is XTB STILL at/above PLN 90? → cap still ~\$2.9B+
- Has cap crossed \$3.3B (PLN ~121)? → threshold likely met

Decision: if cap ≥ \$3.0B → HIGH conviction. If \$2.7-3.0B → MEDIUM. If <\$2.7B → SKIP.

■ Step 3 — Verify XTB relative strength

Compute 12-1 month RS: total return of XTB vs WIG-ALL index.
Required: RS ≥ 60th percentile AND price above 200-day moving average.
XTB at PLN 92.78 near ATH PLN 93.76 — likely above 200d MA (verify from [stooq](https://stooq.pl) chart).
12M return +47% (price) or +53% (total incl. div.) — strong RS likely confirmed.

■ Step 4 — Check XTB float and founder stake

Verify Jakub Zabłocki and XTB Group founders' current ownership from:

- KNF/WSE insider ownership disclosures
- XTB annual report 2025 (ownership structure section)

FIF [EST] = 1 - founder stake ≈ 0.65 (if founder ~35%).
Float-adj cap [EST] = \$2.96B × 0.65 = \$1.93B — must exceed \$1.3B MSCI minimum.

■ Step 5 — Review XTB Q4/FY2025 earnings impact

XTB FY2025: revenue PLN 2,147M (+14.6%), net profit PLN 644M (missed PLN 1B expectations).
Check analyst reactions: were there significant downgrade notes post-results?
A drop to below PLN 80 (cap ~\$2.5B) would change inclusion probability to LOW.
As of March 6, price still near ATH — earnings miss appears priced in.

■ Step 6 — Verify Kruk FY2025 audited results

Full audited annual report due: March 10, 2026 (4 days from report date).
Required: confirm no material negative surprises in the full-year figures.
If Kruk cap approaches \$2.8B+ (\$3.0B+ preferable): re-assess for May 2026.
Otherwise: WATCH for Nov 2026 SAR — re-screen from September 2026.

■ Step 7 — Set May 2026 SAR announcement alert

MSCI May 2026 SAR announcement: approximately 27-29 April 2026.
Set calendar alert. On announcement day:

- XTB confirmed: HOLD to effective date (~28 May 2026). Expect +5-10% drift.
- XTB NOT announced: SELL at market within 30 minutes of open.

Monitor: msci.com/indexes/index-reviews for the press release.

■ **DISCLAIMER:** This report is for research and educational purposes only. It does not constitute investment advice or a solicitation to buy or sell any security. All [EST] figures must be independently verified from live market data before trading. Past performance (2018-2025 MSCI inclusion backtest) does not guarantee future results. MSCI retains committee discretion for borderline inclusion decisions. PLN/USD rate used: 3.68 (March 6, 2026). Data sources: MSCI press releases, stockanalysis.com, kruk.eu, fxnewsgroup.com, investing.com, PPCG Stock, Biznes PAP.
